International Manufacturer & Distribution Partnership Edition

01 | Company Overview

DetectorsMaster is a specialized business brand of ALKARAMA Multi Activities, focused on gold detection technologies, metal detection equipment, mining solutions and exploration technologies in Sudan.

With three years of business experience, DetectorsMaster serves the needs of customers involved in gold prospecting, mining and exploration by providing access to specialized equipment and related services.

Based in Al-Damr, Sudan, DetectorsMaster aims to develop its position as a trusted local partner for international manufacturers seeking to establish or expand their presence in the Sudanese market.

The wider business network includes Logilink, a sister company based in Jebel Ali Free Zone (JAFZA), United Arab Emirates. Logilink's activities focus on international logistics and transactions and provide logistical and commercial support to the business network.

Our objective is to connect global technology providers with local market opportunities through professional distribution, customer engagement and the continued development of technical support.

OUR POSITIONING

Your Gateway to Gold Detection & Mining Technology in Sudan

02 | Vision, Mission & Values

Our Vision

To become a recognized and trusted distribution and representation partner for international gold detection and mining technology manufacturers in Sudan.

Our Mission

To provide access to specialized detection technologies and mining equipment while building sustainable partnerships with global manufacturers, delivering professional customer service and developing local market capabilities.

Our Core Values

INTEGRITY Transparent and trustworthy business relationships.	**PROFESSIONALISM** Consistent standards in service and representation.
PARTNERSHIP Long-term relationships with manufacturers and customers.	**INNOVATION** Keeping pace with detection and mining technologies.
COMMITMENT Sustainable growth and continuous service improvement.	**CUSTOMER FOCUS** Understanding local needs and suitable solutions.

03 | Core Business Activities

GOLD & METAL DETECTION

Equipment for gold prospecting, precious-metal detection and general metal detection applications.

GROUND SCANNING TECHNOLOGIES

Ground-scanning and underground-imaging solutions for exploration and detection applications.

WATER DETECTION EQUIPMENT

Specialized technologies and equipment for water detection and exploration.

MINING & EXPLORATION EQUIPMENT

Equipment and solutions serving mining, prospecting and exploration activities.

IMPORT & EXPORT

Commercial sourcing and international trading of specialized equipment.

TECHNICAL SERVICES

Equipment maintenance, technical assistance, customer training and product consultation.

04 | Sudan Market Focus

Sudan is DetectorsMaster's primary target market. Our strategy focuses on understanding the needs of the local mining and exploration sector and connecting customers with suitable international equipment and technologies.

Target customer segments

- Individual gold prospectors
- Small and medium-scale mining operators
- Mining and exploration companies
- Gold exploration businesses
- Detection equipment dealers and retailers
- Professional equipment users
- Commercial and institutional clients

Local Presence

DetectorsMaster is based in Al-Damr, Sudan. This local presence provides a foundation for developing customer relationships and expanding commercial activities across the country.

This profile does not include unverified market-size statistics, sales figures or market-share claims. Quantified evidence can be added when company records are available.

05 | International Brands & Technology Focus

DetectorsMaster's commercial interests and technology focus include internationally recognized manufacturers in the detection technology industry.

MINELAB	Metal detection technologies
OKM	Ground scanning and 3D detection technologies
XP METAL DETECTORS	Metal detection technologies
OTHER MANUFACTURERS	Specialized international detection and mining equipment

Our objective is to establish direct relationships with manufacturers and develop authorized distribution and representation arrangements for the Sudanese market.

Brand-status clarification: Brand names are referenced for commercial and technology identification purposes only. Their inclusion does not imply current authorization, dealership, endorsement or exclusive distribution. Any such status is subject to written authorization from the respective manufacturer.

06 | Services & Customer Support

EQUIPMENT SUPPLY

Providing access to specialized gold detection, metal detection, ground scanning and mining equipment.

CUSTOMER SUPPORT

Assisting customers with product information, equipment selection and operational guidance.

MAINTENANCE & AFTER-SALES SERVICES

Developing technical service capabilities to support equipment users and strengthen customer satisfaction.

TRAINING & TECHNICAL CONSULTATION

Providing product orientation, practical training and technical guidance within available service capabilities.

INTERNATIONAL SOURCING

Connecting local demand with international equipment manufacturers and suppliers.

07 | Corporate Structure & International Network

ALKARAMA Multi Activities – Sudan

ALKARAMA Multi Activities is the parent business entity under which DetectorsMaster operates as a specialized business brand.

DETECTORSMASTER – SUDAN

DetectorsMaster is the dedicated business brand focusing on gold and metal detection technologies, mining and exploration equipment, product distribution, commercial development and related customer services. Location: Al-Damr, Sudan.

LOGILINK – UAE

Logilink is a sister company based in Jebel Ali Free Zone (JAFZA), United Arab Emirates. Its business activities focus on international logistics and transactions, providing logistical and commercial support to the wider business network.

08 | International Distribution & Partnership Strategy

DetectorsMaster is seeking strategic relationships with international manufacturers of gold detection, metal detection and mining technologies. Our objective is to become an authorized distribution and representation partner for selected international brands in Sudan.

Partnership objectives

- Authorized dealership and representation agreements
- Exclusive distribution opportunities where available and mutually agreed
- Development of local sales and distribution channels
- Manufacturer-supported product training
- Technical support and after-sales service development
- Local brand awareness and marketing campaigns
- Long-term commercial relationships

What we aim to offer our partners

LOCAL MARKET DEVELOPMENT

Building brand awareness and developing commercial opportunities within Sudan.

SALES & DISTRIBUTION DEVELOPMENT

Establishing customer relationships and developing local sales channels.

BRAND REPRESENTATION

Representing manufacturers professionally and in accordance with agreed brand guidelines.

TECHNICAL SERVICE DEVELOPMENT

Building capabilities for product training, maintenance and after-sales support.

INTERNATIONAL COMMERCIAL CONNECTIVITY

Using the Logilink business relationship in the UAE to support international commercial and logistics coordination.

09 | Business Development Priorities

- Expand the portfolio of international detection and mining technology brands.
- Establish authorized manufacturer relationships.
- Strengthen market presence throughout Sudan.
- Develop professional sales and distribution channels.
- Improve technical support and after-sales capabilities.
- Build sustainable relationships with mining businesses and equipment users.
- Expand international sourcing and commercial connections.

Development roadmap

PRIORITY	FOCUS
Foundation	Finalize corporate identity, company profile and official website.
Manufacturer outreach	Prepare tailored proposals and approach selected manufacturers.
Distribution readiness	Define sales channels, service processes and training requirements.
Market development	Build customer relationships and a measurable local market plan.

10 | Why Partner With DetectorsMaster?

- A dedicated business brand focused on detection and mining technologies.
- Three years of commercial experience.
- A local presence in Al-Damr, Sudan.
- A parent business structure under ALKARAMA Multi Activities.
- An international sister-company network through Logilink – JAFZA, UAE.
- A commitment to developing local distribution and technical service capabilities.
- A long-term vision for international manufacturer partnerships.

LET'S BUILD A PARTNERSHIP

Your Technology. Our Local Market. Shared Growth.

DetectorsMaster welcomes international manufacturers, technology providers and strategic business partners interested in exploring distribution and representation opportunities in Sudan. We look forward to developing long-term relationships built on mutual trust, professional cooperation and sustainable commercial growth.
